The Wallonia Export-Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above. In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

**FLANDERS
INVESTMENT &
TRADE**

The Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises. Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors.

The agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of the Flemish economy, but also an extensive network outside of Flanders. We have just that for you. Do visit our website and discover our worldwide network.

With over 100 offices we are bound to be conveniently located near you, wherever you are.

The Brussels Business Support Agency is offering free-of-charge a range of solutions and advice for start-ups and scale-ups in Brussels and beyond, as well as services focusing on strategy, finance, clustering and internationalization.

One of the missions of hub.brussels is indeed to facilitate the internationalization of Brussels' economy by helping Brussels businesses compete in global markets. More than 90 economic and commercial attachés located on every continent provide free support to SMEs, approach potential local prospects and partners, organize networking events...

Concrete initiatives in Brussels and abroad include trade missions, networking days, invitations for decision-makers, and the organization of shared exhibits at international trade fairs. In addition, hub.brussels also works to attract foreign investors to Brussels, providing them with assistance in establishing their business in Europe's capital.

A "Welcome Package" is available to potential investors, providing them with fully equipped office space for three months and a wide range of services so that they can experience the advantages of setting up business operations in Brussels.

BIKE & WIN

Rue Fréson, 46
4130 TILFF

Website : www.partner.bikenwin.com
Facebook: [@bikenwin](https://www.facebook.com/bikenwin)

DELEGATE

Guillaume KERCKHOFS, Administrateur
délégué
Phone: +32 472 95 03 45
E-mail : guilz@bikenwin.com

The logo for Bike & Win features the word "BIKE" in a dark blue, sans-serif font. The letter "I" is replaced by a stylized bicycle wheel icon. To the right of "BIKE" is a blue ampersand "&". To the right of the ampersand is the word "WIN" in the same dark blue, sans-serif font.

COMPANY BACKGROUND

This is the story of a man trapped in boxes: the screen, the office, the car. This is the story of a man who rides a bike to regain freedom and health, save money and spend time with his family. This man set himself the goal to share his happiness. That's why he co-founded Bike & Win.

ADDED VALUE

Bike n 'Win aims to reduce the number of cars in cities by encouraging bike commuting (time saving, air quality, attractiveness) and for improving the workplace wellness (biking reduce the rate of absenteeism, improve the health, decrease the stress).

RANGE OF PRODUCTS

Bike&Win is a gamify cycling app to promote bike commuting and reach a dynamic community. Companies, shops or public services can create on the app bike challenges to encourage their employees, customers or citizens to practice cycling in daily commute.

BUILDWIND

Website : www.buildwind.net

DELEGATE

Alessandro GAMBALE, CEO
Phone : +32 486 47 39 20
E-mail : gambale@buildwind.net

COMPANY BACKGROUND

BuildWind uses advanced, three-dimensional numerical simulation to predict airflow, heat transfer and contaminant transport inside and around buildings. We assist city planners and building designers in creating healthier, safer and more sustainable urban and industrial environments.

ADDED VALUE

- Focused on architectural and environmental applications only: our tools are optimized and our engineers are trained for this very specific field.
- We develop, implement and validate innovative ideas and technologies.
- We provide our clients with excellent value for money.

RANGE OF PRODUCTS

Wind load calculation, pedestrian wind comfort and safety studies, site planning, indoor and outdoor air quality assessment, simulation of Heat Ventilation and Air Conditioning (HVAC) systems, fire and smoke simulation.

Wietse VAN RANSBEECK, Co-founder and CEO

Mobile : +32 474 86 74 35
E-mail : aline@citizenlab.co

COMPANY BACKGROUND

CitizenLab is a citizen participation platform. We help cities and local governments consult their citizens, manage their input efficiently and integrate these insights into the decision-making process.

The company was founded 4 years ago in Brussels, and now has over 100 active clients.

ADDED VALUE

CitizenLab helps cities quickly reach large number of citizens, and talk to groups which don't usually come to traditional meetings (such as young or active citizens). The platform accommodates different forms of consultation such as idea gathering or participatory budget. Integrated artificial intelligence also makes it easy for civil servants to manage the input and extract valuable insights.

RANGE OF PRODUCTS

- Different consultation modes: idea collection, survey, votes, participatory budgeting
- Intuitive back-office to effortlessly manage and share the input collected
- Artificial intelligence and data from real-time dashboards to extract information and make better decisions.

Mitch DE GEEST, CEO
Mobile : +32 476 97 36 48
E-mail : mitch.degeest@citymesh.com

COMPANY BACKGROUND

Citymesh is a Belgian Operator specialized in the rollout and maintenance of large scale wireless networks. The company was a CityWiFi pioneer and now focuses on leveraging its infrastructure with smart solutions such as sensor analysis, footfall analytics and smallcell 5G deployments, integrated into a central cloudbased city management tool.

ADDED VALUE

Our goal is to create an easy to implement, highly scalable infrastructure which serves as a basis for all smartcity challenges. Next to our innovative products we also bring our Belgian smartcity operator experience to the table. Our goal is to help you achieve your goals efficiently, define quickwins and build the foundation of your smartcity adventure.

RANGE OF PRODUCTS

Citymesh builds products to create a versatile smartcity infrastructure. Next to the smart city box we offer a flexible city management software platform that centralizes all the gathered data (WiFi, Footfall, sensors) independently of the used technology (WiFi, bluetooth, Sigfox, Lora, 5G).

COMPANY BACKGROUND

Antwerp is a pocket-sized metropolis with a strong dedication to innovation. In Antwerp global business clusters such as the harbour (second in Europe), chemistry (second in the world) and diamond trade (first in the world) meet groundbreaking innovation ecosystems around digital innovation, cleantech and creativity. The city is the perfect gateway to the European market and is open for business and innovation.

ADDED VALUE

Antwerp is right on track to become a European reference city for digital innovation. The unique combination of superb connectivity in the heart of Europe, world class business clusters, a human-scale and diverse city and thriving innovation ecosystems, all strengthened by a strong public ambition, make that Antwerp is the ideal (testing) ground for digital innovation to flourish.

RANGE OF PRODUCTS

Do you want to become part of a thriving ecosystem for digital innovation? Antwerp offers you a world of opportunities and is ready to build together on significant projects:

1. Antwerp smart zone
2. The Beacon, the IOT & AI hub
3. Buy from startups program & Antwerp City Platform as a Service
4. Smart mobility projects
5. Circular South
6. Smart Port
7. Drones4Antwerp

Direct Line : +32 478 32 27 26
Mobile : +32 478 32 27 26
E-mail : olivier.lefevre@nrb.be

COMPANY BACKGROUND

CIVADIS is a company that develops software for public administrations.

Our ambition is to meet the specific needs of our customers by:

- Developing the decision-making tools necessary for the good management of local administration;
- Long-term support in the deployment of both software and hardware solutions;
- Ensuring the availability of your IT services
- Creating high value-added solutions based on both technological know-how and knowledge of your business

ADDED VALUE

Access your administrative documents online with just a few clicks!

The e-desk enables citizens to request documents or products via the website of their local government or via an information point installed by their administration.

In the past, citizens who needed administrative documents had to go to their town hall and often had to wait before being served. Nowadays, the e-desk interface allows them to order their documents directly on the website of their municipality. In combination with a secure payment system, the e-desk is aimed at simplifying the administrative procedures as much as possible.

COMMUNITHINGS

COMPANY BACKGROUND

CommuniThings is a smart-parking provider. Its platform consists of LPWA (LoraWAN and NB-IoT) sensors and a management-backend, fully developed inhouse.

In April this year CommuniThings completed an Orange led Series-A round in Belgium.

ADDED VALUE

The smart-parking service is catering to residents (guidance on app), parking wardens (alerts on violation) and cities (statistics & reports). The sensors consist of triple detection technologies (magnetic, ultrasound, infrared) allowing >98% detection rate.

We also provide camera based detection using agnostically overhead cameras for counting.

RANGE OF PRODUCTS

CommuniThings offering consists of:

- Guidance to available spots for drivers via mobile app
- Management dashboard to parking controllers
- Statistics on usage patterns to municipalities

DELEGATE

Philippe BAIJOT, CEO
Mobile: +32 495 89 73 54
E-mail: philippe.baijot@d2d3.com

COMPANY BACKGROUND

D2D3 is a company of services in the development of specific applications for Geographical Information System, data recovery, encoding, data creation and integration thereof in different GIS.

D2D3 is resulting from various complementary skills and career paths since 2004.

ADDED VALUE

Thanks to its know-how and its collaborations, we are specialized in the specific development of various applications, in the encoding, creation and management database.

We also offer different services to companies and administrations that need visualization, promotion, document management, communication and optimized to their needs.

We have developed our own encoding and geographic information system solutions.

RANGE OF PRODUCTS

We currently have in the public domain more than 80 municipalities in Belgium who trust us every year to update their cartographic data and who use our applications for the service of works, for cemeteries and civil-status, for urban planning and environment services.

We are also on French territory with more than 500 municipalities to date.

MAIN REFERENCES

We also have some clients such as the European Space Agency for whom we are currently producing an application for the Redu-Belgium site in full 3D modeling and the development of satellite antenna reception management module.

Empowered by KU Leuven, VITO, imec & UHasselt

COMPANY BACKGROUND (ORGANISER)

EnergyVille is a collaboration between the Flemish research partners KU Leuven, VITO, imec and UHasselt in the field of sustainable energy and intelligent energy systems. Our researchers provide expertise to industry and public authorities on energy-efficient buildings and intelligent networks for a sustainable urban environment. This includes, for example, smart grids and advanced district heating and cooling.

ADDED VALUE

EnergyVille aims to be a driver in the Thor science park in Genk (Belgium) in the areas of research, business development and employment creation. The research center is supported by the city of Genk, the Flemish Government, the Province of Limburg, LRM, Nuhma, POM Limburg and the European structural funds

RANGE OF PRODUCTS

Research and development in renewable energy

MAIN REFERENCES

One of the objectives of EnergyVille is to become one of the top five European institutes in innovative energy research. In this context, the center was embedded in major national and international networks right from the start. It covers research, development, training and innovative industrial activities under one name and in close collaboration with local, regional and international partners.

COMPANY BACKGROUND

At Futureproofed we bring people together who share a common purpose: fight climate change. Because we love what we do, enthusiasm comes naturally.

At Futureproofed, we care about driving cities and companies to make this transition happen while becoming more attractive and futureproofed.

With our online tool FutureproofedCities, we connect cities and help them implement climate action

ADDED VALUE

FutureproofedCities is your online tool to transform city climate plans into climate action. Follow up on your progress and predict the impact of your actions on CO₂ and cost savings. Make your city more attractive and sustainable. Work efficiently, save time, collaborate easily with your colleagues and other cities, track progress and be part of a growing community.

Today we are active in 3 EU regions, with 105 cities and 1850 actions!

RANGE OF PRODUCTS

FutureproofedCities connects cities and helps them implement climate action. Using our SDG framework we guide companies in moving away from fossil fuels and help save costs, reduce risks, grow their business and improve brand value.

COMPANY BACKGROUND

Imec is the world-leading research and innovation hub in nanoelectronics and digital technologies. The combination of our leadership in microchip technology and software and ICT expertise is what makes us unique. By leveraging our world-class infrastructure and local and global ecosystem of partners across a multitude of industries, we create groundbreaking innovations for smart cities and mobility, logistics & manufacturing, healthcare, energy & education.

ADDED VALUE

How can we use technology to improve mobility, increase road safety and lower the ecological impact of traffic? Or make city mobility more efficient, cleaner and safer at the same time? What is the best way to monitor air quality? How can we use sensors to predict and prevent problems such as flooding?

These are just a few of the questions the imec City of Things program is trying to answer. By combining innovative technology with in-depth user research, we want to help cities become smarter and future-proof - in Flanders and everywhere else. Our cities are filled to the brim with big data. The challenge is to turn this information into knowledge and practical applications that can benefit everyone who lives and works in the city.

In our quest for a better city life, we pool our creativity with citizens, governments, companies and other smart city innovators.

RANGE OF PRODUCTS

Imec can be your partner for: visioning, co-creation, testbeds, integration, testing and validation, roadmapping, privacy, prototyping, technology selection,...

inseetu.
a place to design places

COMPANY BACKGROUND

Inseetu was founded in 2017, driven by the experience of Damien Gourdin and Valérien Larose, both specialised in physical experience design through urban furniture and signage, soon joined by Jérôme Marcq, an experimented software architect.

Inseetu's primary goal is to put new technologies at the service of multidisciplinary teams who design optimised physical experiences for public spaces, letting them prototype realistically and visualise the experience through the user's eyes.

ADDED VALUE

Using Inseetu, multidisciplinary teams of designers, site managers, furniture constructors and installers, centralise all their project's data into one app, instead of losing time switching between multiple software. Inseetu geolocalises objects on a map, generates a visualisation of the objects in their environment, and generates an estimated budget for the project.

Team members collaborate directly on the platform thanks to Inseetu's commenting features, resulting in fewer errors made, less time lost, and less stress generated.

RANGE OF PRODUCTS

Inseetu is composed of :

- a web app integrating all projects details (objects families, implementation maps, technical information, object visualisations, budgets, catalogue...)
- a synchronised mobile app that lets the users visualise their objects in the environment, thanks to augmented reality.

MAIN REFERENCES

Inseetu's beta version is currently used by early adopters involved in design, construction or distribution of urban furniture and signage in Belgium and France.

In collaboration with the French company Metalink-Urban Plug, Inseetu currently performs a long-term experiment initiated by Société du Grand Paris and Ile-de-France Mobilités, aiming to manage public spaces dynamically by installing and removing urban furniture according to seasons or events, based on their actual usage, quantified by sensors.

JULES LESMART

Twitter : [@JulesLesmart](#)

DELEGATE

Olivier LEFEVRE, Mister #Smartcities

Mobile : +32 478 32 27 26

E-mail : Olivier.lefevre@nrb.be

COMPANY BACKGROUND

Our local authorities are forced to do more with less resources. In addition, citizens have incorporated the new digital technologies into their everyday life as well as their professional life. As a result, they expect local authorities to do the same. They demand a more efficient, user-friendly and faster administration, and a more modern, greener and smarter city. So in fact, citizens are driving the digital transformation of municipalities, or in other words, they want to become #SmartCity users. We support a pragmatic approach towards making our towns and cities smarter.

ADDED VALUE

The #SmartCity projects need to be based on the objectives of each individual town or city. They also need to be based on what is already available (infrastructures, data, applications...) to transform the administration's operating method and make it provide new services to citizens and companies.

Our policy-makers are often faced with complex and varied problems that require a multidisciplinary approach involving several actors. Furthermore, the new solutions proposed must be integrated into and connected to the software already in place in towns and cities in order to improve their business processes. Consequently, the Jules Lesmart ecosystem is extremely relevant since it considerably facilitates the integration of its different components with a particular emphasis on making the experience of the user (citizen, employee or policy-maker) as enjoyable as possible.

RANGE OF PRODUCTS

Through the adventures of Jules Lesmart, you can discover how to address sensitive and complex issues such as inner-city depopulation, intergenerational cohabitation, inner-city pollution or the involvement of citizens in the public debate by linking the information and solutions of various partners.

We envisage developing Jules Lesmart by involving local and regional governments in our roadmap of products and services on the basis of a charter and a common will to collaborate and push boundaries.

LUMENCY

COMPANY BACKGROUND

Lumency is a pioneer in the creation of wireless sensor arrays and smart actuators which can be used for smart buildings, smart lighting and environmental monitoring. Based on our wireless sensor arrays and smart actuators, we create for our Customer basis, embedded electronic and ICT solutions which can be integrated in smart city and smart building applications.

ADDED VALUE

Lumency creates embedded electronic and ICT solutions for smart city and smart building applications. Our aim is to help our customer base to realize their smart environment concepts by supporting them with our advanced smart sensors, smart actuators and smart Gateway.

RANGE OF PRODUCTS

- 1) Integrated Smart Lighting System: allows our customers to achieve important savings in their energy consumption and maintenance by means of smart controllers and advanced sensors.
- 2) Environmental Monitoring System: we provide advanced sensors to monitor sound pollution, air quality, temperature, humidity, light intensity, UV radiation, RF radiation, and IR radiation.

COMPANY BACKGROUND

Merkator provides software and services to Telecom Companies, SmartGrid Operators & Governments for key workflows that touch the "*public domain*": above and below. Merkator has offices in Belgium, The Netherlands and Spain with more than 70 experts. The Merkator Group revenues exceed 10M€ in 2019.

ADDED VALUE

Merkator operates in the unique ecosystem of utilities that need infrastructure works, contractors that need permits to execute, cities that grant permits and citizens that are impacted by the hindrance. Location is always key in all these workflows. Our software solutions contribute to safer cities above ground (permits, communication, road safety) and better infrastructure networks (end-to-end life cycle asset management for all types of networks).

RANGE OF PRODUCTS

EagleBe – Smart City Platform used by 80+ Smart Cities.

Marlin – Smart Asset Management used by Tier1 telco's and Smart Grid Operators.

COMPANY BACKGROUND

Option connects Things to the Cloud. With over 30 years of experience and many industry's firsts in the wireless industry, we are ideally positioned to bring the most efficient, reliable and secure IoT solutions to business and industrial markets. We work with system integrators, value-added resellers, application platform providers, value-added distributors and network operators to bring tailor made solutions to end-customers.

ADDED VALUE

Option's expertise and its extensive portfolio of flexible IoT hardware and software and its provisioning and development tools deliver maximum flexibility and enable customers to rapidly and cost-effectively deploy their smart city solutions.

RANGE OF PRODUCTS

Option's IoT Gateway devices, CloudGate and CloudGate Micro come with CloudGate Universe, a cloud-based configuration and deployment platform; an SDK for application development and a HDK for prototyping custom expansion cards.

Each CloudGate includes LuvitRed, a visually configurable device agent with "drag and drop & visual wiring" configuration.

Also available are a pre-built library of software applications and modular hardware expansion cards.

COMPANY BACKGROUND

Every day, 35% of distributed water is lost in homes, buildings and infrastructures. With our technology installed in less than 5 minutes, Shayp instantly assesses water leaks in real-time and dispatches maintenance efficiently to drive down costs.

ADDED VALUE

Shayp cuts costs by mitigating water loss and potential damages in buildings and homes. Shayp uses AI and non-invasive IoT to provide real time ranking of buildings with the most risky leaks. Insurance companies can thus lower the risk of investments, build new home assistance services and increase customer satisfaction by rapidly addressing leaks before damage occurs. Shayp uses AI to assess the risk and costs from water consumption data acquired with non-invasive and easy to install IoT.

RANGE OF PRODUCTS

Shayp provides real-time ranking of buildings with the most costly water leaks in order to prioritize assistance and maintenance. Our patented IoT technology acquires water consumption data and our software reliably establishes the leak status.

COMPANY BACKGROUND

From Concept to Production smartends bring your idea to the market as business partners. Smartends is dedicated to helping start-ups and larger companies build industrialized Smart Solutions. We work as business partners. We charge a share of the value created not a consulting fee. Our first product is called BrighterBins which is a smart way of collecting waste from public bins.

ADDED VALUE

Bins are often emptied when they are not full. This is inefficient. Work hours and fuel are lost in the process. When bins are not picked up in-time they overflow, creating a dirty environment. BrighterBins provide the world's simplest and most cost-effective solution for municipal waste pickup. The system optimizes the collections, avoids overflowing bins and saves up to 35% on pickup costs.

RANGE OF PRODUCTS

1. BrighterBins waste bin sensor
2. BrighterBins Waste Management Platform
3. Inhouse designed ultrasonic sensors for distance measuring applications

The Enterprise Europe Network (EEN) offers support and advice to European SMEs, helping them to make the most of business opportunities in the EU. Launched in 2008 by the European Commission, EEN has branches in more than 60 countries and is supported by 600 partner organizations in and outside Europe.

Its 3000 experts help businesses to:

- grow and innovate,
- find business partners and new markets abroad,
- turn ideas into marketable products and profits,
- make the most of EU financing and funding, and research funding in particular.

Walloon SMEs can easily benefit from this substantial and accessible business and technology partnering network, thanks to 9 local organisations delivering support right to their doorstep.

INFOPOLE Cluster TIC is the business cluster that brings together and unites professionals from Information and Communication Technologies (ICT) in order to promote business and innovation through partnership.

Our ambition is to contribute to the implementation of a specific and original response to strengthen synergies and allow operators to better position themselves on the market.

Several application areas are the foundation of our actions: health (eHealth), intelligent transports (Intelligent Transport Systems), green technologies (ICT for Green), the public sector (eGov) but also the fields of activity that are rapidly changing such as the Internet of Things (IoT), the Serious Game, Big Data, Open Data, Transmedia, ...
